"Moturisme Ara Lleida" proposes a series of specialised routes and services for motorcyclists from near and far that will allow them to discover the Pyrenees and the Lands of Lleida by road and motorbike.

10 routes have been created that run through the territory of Lleida. All of these are of great tourist and scenic attractiveness and combine stretches of little-used secondary road with numerous bends with other straighter stretches of main road. All of the roads along which the Moturisme routes pass have been supervised by a team of experts who have confirmed that they have excellent tarmac surfaces. The distances to be travelled along each of these routes range from 200 to 300 km. This means that they can be easily covered within a day, including stops at the different points of tourist interest that the routes travel through. The majority of the routes can be followed throughout the year; the exceptions are those which include stretches of high-altitude mountain road along which it is possible to find snow and ice in winter.

This project establishes a system of guarantees with a seal of quality that currently identifies tourist establishments offering accommodation and complementary restaurant, café and museum services, among others.

Thanks to this project, those who love travelling by motorbike will be able to get to know the Pyrenees and the Lands of Lleida and to enjoy the landscapes and gastronomy of the local area with the guarantee of being well-received and finding excellent roads and facilities.
